

Home Care Cost

Regular Day Homecare Cost

Our charges reflect the experience of our team and the quality of the services and support we provide. They enable us to recruit, train and retain the best team of Care Workers by paying them what they deserve.

Regular care duties that occur every week – our minimum duty charge is 30mins.

60 minutes - £24.00

45 minutes - £18.00

30 minutes - £12.00

Night Care

With night care, it's good to know someone's always there

There's nothing like getting a good night's sleep. Of course, the same can be said of a bad night's sleep. That's why we offer Overnight Care. Because we want your loved ones to have the best chance possible of getting the sleep they need.

We offer two types of Night Care, both of which are provided by a highly-trained and dedicated team of Care Experts working throughout the night. That way, the people who matter most to you can feel safe and supported, no matter what time of day it is.

Sleeping Night

Sleeping Night means that one of our Care Experts will sleep in your loved one's home for eight hours or more. So they're always around if needed. But this is less about continual support throughout the night and more about giving your loved one peace of mind and the comfort of knowing they're not alone.

That way they'll feel more relaxed, less anxious and be less likely to miss out on that all-important shut-eye.

Who's Sleeping Night for?

It's for anyone who needs a bit of support 1-2 times throughout the night.

Waking Night

Waking Night means that one of our Care Experts will visit your loved one's home in the evening, spending eight hours or more with them. They'll help with things like going to the bathroom, taking medication, changing positions in bed due to injury and more.

Our Care Experts will be by your loved one's side, giving them the care and comfort they need, so they can get the sound sleep they crave.
