

Our Approach to Pricing: Personalised, Fair, and Needs-Led

At EverKind Services, we believe that no two people's needs are the same, so their care shouldn't be priced the same either.

Rather than offering a single "one-price-fits-all" rate, we take a personalised approach. Every privately-funded client receives a full assessment carried out by our Clinical Lead and Registered Managers. This ensures we understand the level of support required, from companionship through to highly complex care, before providing an accurate and fair price.

This assessment allows us to:

- Ensure your care plan truly reflects your needs
- Allocate the right skills, experience, and clinical oversight
- Provide safe, tailored support that enables you to live *your life, your way*
- Offer transparent pricing based on the actual level of care required

We do provide a starting hourly rate, as required for CareFind, to support transparency and help individuals gauge potential costs. However, your final fee will always be confirmed following your personalised assessment, because your care should be built around *you*, not built around a generic price tag.
